Project Management — Google

Backend Developer — Meta

Leading Teams — UIUC

Negotiation Strategy — Yale

Klemen Kocic

AI Implementation & Project Management

EXPERIENCE

Consultant

Jul 2025 — Present

Luminous Group — Berlin / Munich, Germany

- Design and build Luminosity's interaction experience and human-agent architecture — the transparency, pacing, and progressive structure that let domain experts engage with autonomous AI systems.
- Translate business needs into AI implementation plans: gather requirements, scope solutions, and bridge non-technical stakeholders with engineering teams.
- Build internal tooling and integrations (Attio, Linear, GitHub, agent-mediated workflows) so AI is part of how the firm operates day-to-day, not just what it advises on.
- Author of six published articles on AI strategy and human-AI collaboration, including *What Agents Cannot Want*, *The Resolution of Intelligence*, and *What You Govern Determines What You Become*.

Technical Lead

Jan 2025 — Feb 2026

NHS Personal Training GmbH — Munich, Germany

- Technology development for a premium personal training studio — digital infrastructure for coaching delivery, client management, and business operations.
- Co-developed a native iOS coaching app (Swift): real-time session booking, progress tracking, trainer-client communication.
- The web platform: scheduling, training plans, exercise libraries, invoicing, and point-of-sale.
- A team of 6 offshore engineers, 78% on-time release rate across concurrent product streams.

Personal Trainer

Apr 2024 — Dec 2024

MTM Personal Training — Berlin, Germany

- Coached executives and founders one-on-one in a premium studio setting, pursuing a deep interest in sport and human performance.
- Built a professional network of German founders and CEOs through coaching relationships — connections that informed later consulting and startup work.

Project Manager

Feb 2022 — Feb 2024

MetaKing Studios — Stockholm, Sweden

- Led launch and live operations of BLOCKLORDS, an online blockchain strategy game that reached \$40M in trade volume.
- Managed a 10-person cross-timezone team; cut deployment projection from 6 to 4 months at 97% sprint velocity.

Program Manager & Data Analyst

Mar 2020 — Feb 2022

Seascope Network — Seoul / Stockholm / Lisbon

- Coordinated 5 gaming project launches across Ethereum, Polygon, and BSC; negotiated ~\$500K investor funding extending runway by ~9 months.
- User and partner ecosystem analysis contributing to 30+ integrations and MAU growth from ~10K to ~56K.

EDUCATION

University of Ljubljana — School of Economics and Business

2019 — 2023

Bachelors of International Business

University of Seoul — Exchange

2021 — 2022

Business Administration

ISCTE Lisboa — Erasmus
