Experience

AI Systems Architect, Luminous Group – Munich, Germany July 2025 – present

- Co-architect of **Luminosity**, our internal **multi-agent** multi-person production system for seven people, designed around the three-layer architecture (Interaction, Coordination, Data) behind the company's "AI that instruments the human" thesis.
- Built **Luminosity's** video pipeline and team-coordination workflows. Co-built the runtime: agent provisioning, MCP tool servers, the rules-and-skills harness, and knowledge and context graphs.
- Built and operate the company's weekly AI-intelligence pipeline: ~14 parallel agents pull from 40+ sources across 12 categories into a Tana knowledge graph, turning ~50 net-new entries a week into concrete action items per teammate and per agent (also surfaced in Slack and a shared GitHub doc).
- Co-led ~6 capability-assessment engagements with senior leaders across healthcare, sport, law, marketing, automotive sales, and architecture. Translated ambiguous AI goals into specific workflows, each shipped as a working product or reference architecture their team adopted.
- Co-inventor on **patents** covering **multi-agent** multi-team coordination.
- Shape Luminous Group's editorial voice on public surfaces (website, positioning, bios) with the founding team. Co-author of eight of the twenty essays at luminousgroup.net/liminality on human-AI collaboration.

Technical Lead, NHS Personal Training GmbH – Munich, Germany Jan 2025 – Feb 2026

- Architected and co-built the full system: React Native (Expo) apps for clients and coaches over a Ruby on Rails + PostgreSQL backend, covering scheduling, training plans, exercise library, invoicing, and point-of-sale with role-based access. Led 6 offshore engineers at 87% on-time release; adopted by every coach and client, still in daily production use.
- Built macro/meso-cycle plan generation in our methodology software with an AI layer on top for added support, cutting training-plan creation from 4 hours to 30 minutes.
- Built the bilingual corporate website solo, plus 5 partner portals expanding B2B reach.

Project Manager, MetaKing Studios – Stockholm, Sweden Feb 2022 – Feb 2024

- Shipped **BLOCKLORDS**, an online blockchain strategy game that reached \$40M in trade volume; led a 10-person cross-timezone team and cut deployment projection 6 → 4 months at 97% sprint velocity.
- Coordinated the team across Jira, Asana, and Miro from architecture to game economy (using Machinations) to the Unity build, plus a Unity-to-blockchain bridge designed to stay non-intrusive so players never had to touch the on-chain layer to enjoy the game.
- Owned go-to-market for the **BLOCKLORDS** launch: marketing materials, community activation across Discord, Telegram, and X, partnerships with Web3 gaming guilds, launch-day coordination across regions, and on-chain growth tracking after launch.
- Built Grafana and Tableau dashboards for on-chain analytics, giving leadership real-time visibility into game-economy health and player behaviour.

Program Manager & Data Analyst, Seascope Network – Seoul / Stockholm / Lisbon Mar 2020 – Feb 2022

- Shipped 5 gaming launches across Ethereum, Polygon, and BSC; managed Lighthouse, a fund-generating platform supporting 10+ external game developers; negotiated ~\$500K investor funding (~9 months runway).
- Partner-ecosystem analytics drove 30+ integration decisions and 460% MAU growth (10K → 56K).

Projects

Charles

AI strength-training coach for iOS. Periodised programmes that rebuild session by session. Flutter + Supabase + pgvector (two-layer architecture), multi-model orchestration (Claude, Gemini), six deterministic filter layers wrapping the model.

Viadio

AI memory video app, live on App Store and Google Play. Image-research algorithm and prompting structure that turns a user's existing phone photos into a memory video; the AI is invisible to the user.

Other shipped products

ViaVia (multi-city European travel, live) · CelesteAI (localised astrology, live) · ShipStack (production framework for AI-native software, internal at Luminous Group).

Skills

AI & LLMs: Claude, GPT, Gemini, multi-model orchestration, LangGraph, MCP, knowledge graphs, context graphs, Pinecone, RAG, prompt design, agent architecture, evaluations

Engineering: TypeScript, Python, Swift/SwiftUI, Flutter, React/Next.js, Node.js, PostgreSQL, Supabase, pgvector

Solutions & Delivery: Agile and adaptive delivery, agility-based evaluation, workshop facilitation, executive presentation, technical scoping, presales, stakeholder alignment, CRM (Salesforce, Attio), knowledge tooling (Tana, Obsidian)

Education

University of Ljubljana, BA in International Business – Ljubljana, Slovenia Sept 2019 – June 2023

- Bilateral exchange at University of Seoul (2021–2022), on scholarship.
- Self-taught engineer since 2018. Shipped production iOS, Android, web, blockchain, AI systems, and knowledge graphs alongside the degree.

Languages

Languages: Slovenian (Native) · English (C2) · Serbo-Croatian (B2) · German (B1)

Selected Writing

They Built It. They Can't Control It. (with Barton Friedland and Jim Highsmith) · *What Agents Cannot Want* · *The Displacement of Judgement* (with Barton Friedland). All at luminousgroup.net/liminality.
