

Klemen Kocic

AI Systems Architect · Forward-Deployed AI · Multi-Agent Production Systems
 Munich, Germany | klemen.kocic@gmail.com | klemenkocic.com | linkedin.com/in/klemenkocic
 github.com/Klemenkocic

Summary

Co-architect of an internal **multi-agent** multi-person production system (30 agents, 5 machines, two years live); co-inventor on its **patents**. Hands-on across iOS, web, and **LLM** orchestration. Customer-facing engagements with senior leaders across healthcare, sport, law, marketing, automotive sales, and architecture, plus one full company. Ship surgical AI: deterministic code where it matters, model where it has to.

Experience

AI Systems Architect, Luminous Group – Munich, Germany

July 2025 – present

- Co-led capability-assessment engagements with senior leaders across healthcare, sport, law, marketing, automotive sales, and architecture, plus one full company. Helped them translate ambiguous AI goals into specific workflows their teams adopted.
- Co-architect of **Luminosity**, our internal **multi-agent** multi-person production system (30 agents across 5 machines, two years live), built around the three-layer system architecture (Interaction, Coordination, Data) behind the company's "AI that instruments the human" thesis.
- Built **Luminosity's** video production pipeline and the team-coordination workflows that keep the distributed team aligned. Co-built the runtime infrastructure: agent provisioning, MCP tool servers, the rules-and-skills harness, and knowledge and context graphs.
- Built an internal system that collects signal from across the AI ecosystem, distributes it to the team, and surfaces actionable items for the company's strategy.
- Co-inventor on **patents** covering **multi-agent** multi-team coordination.
- Shape Luminous Group's editorial voice on public surfaces (website, positioning, bios) alongside the founding team. Co-author of eight of the twenty essays at luminousgroup.net/liminality on human-AI collaboration.

Technical Lead, NHS Personal Training GmbH – Munich, Germany

Jan 2025 – Feb 2026

- Co-developed a native iOS coaching app (Swift, SwiftUI): real-time booking, progress tracking, trainer-client communication.
- Built the web platform covering scheduling, training plans, exercise libraries, invoicing, and point-of-sale, plus a bilingual corporate site and 5 partner portals expanding B2B reach.
- Coordinated 6 offshore engineers across concurrent product streams at 78% on-time release rate. Deployed AI into the coaching team's daily workflow with applied use cases.

Project Manager, MetaKing Studios – Stockholm, Sweden

Feb 2022 – Feb 2024

- Shipped **BLOCKLORDS**, an online blockchain strategy game that reached \$40M in trade volume; led a 10-person cross-timezone team and cut deployment projection 6 → 4 months at 97% sprint velocity.
- Coordinated the team across Jira, Asana, and Miro from architecture to game economy (using Machinations) to the Unity build, plus a Unity-to-blockchain bridge designed to stay non-intrusive so players never had to touch the on-chain layer to enjoy the game.
- Owned go-to-market for the **BLOCKLORDS** launch: marketing materials, community activation across Discord, Telegram, and X, partnerships with Web3 gaming guilds, launch-day coordination across regions, and on-chain growth tracking after launch.
- Built Grafana and Tableau dashboards for on-chain analytics, giving leadership real-time visibility into game-economy health and player behaviour.

Program Manager & Data Analyst, Seascope Network – Seoul / Stockholm / Lisbon

Mar 2020 – Feb 2022

- Shipped 5 gaming launches across Ethereum, Polygon, and BSC; managed Lighthouse, a fund-generating platform supporting 10+ external game developers; negotiated ~\$500K investor funding (~9 months runway).
- Partner-ecosystem analytics contributed to 30+ integrations and MAU growth from ~10K to ~56K.

Projects

Charles (Beta)

AI strength-training coach for iOS. Periodised programmes that rebuild session by session. Flutter + Supabase + pgvector (two-layer architecture), multi-model orchestration (Claude, Gemini), six deterministic filter layers wrapping the model.

Other shipped products

ViaVia (multi-city European travel, live) · Viadio (AI memory videos, live on App Store + Google Play) · CelesteAI (localised astrology, live) · ShipStack (production framework for AI-native software, internal at Luminous Group).

Skills

AI & LLMs: Claude, GPT, Gemini, multi-model orchestration, LangGraph, MCP, knowledge graphs, context graphs, Pinecone, pgvector, RAG, prompt design, agent architecture, evaluations

Engineering: TypeScript, Python, Swift/SwiftUI, Flutter, React/Next.js, Node.js, PostgreSQL, Supabase, pgvector

Solutions & Delivery: Workshop facilitation, executive presentation, technical scoping, presales, stakeholder alignment, CRM (Salesforce, Attio)

Education

University of Ljubljana, BA in International Business – Ljubljana, Slovenia

Sept 2019 – June 2023

- Exchange semester at University of Seoul (2021–2022)

Languages

Languages: Slovenian (Native) · English (C2) · Serbo-Croatian (B2) · German (B1)
